

Full Stack Developer

AXUMAWIT LEAKE

Full Stack Developer with experience building web applications and AI-powered solutions using JavaScript, TypeScript, Next.js, React.js, Vue.js, Express.js, NestJS, and MongoDB. Skilled in developing responsive user interfaces, scalable REST APIs, and reliable backend services. Contributed to projects including a home rental platform, an AI-powered adaptive learning system, and a loan default prediction model for microfinance institutions. Experienced in AI API integration, prompt engineering, and modern development tools such as Git, GitHub, Docker, Figma, Codex, and Claude AI. Focused on writing clean, maintainable code while delivering practical solutions.

EDUCATION

Mekelle University
BSc in Information Technology
2026

SKILLS

- Frontend:** JavaScript, TypeScript, Vue.js, UX Design
- Backend:** Express.js, NestJS, MongoDB, REST API Development
- AI:** AI API Integration, Prompt Engineering
- Tools:** Git, GitHub, Docker, Figma, OpenAI Codex, Claude AI

LANGUAGES

- Amharic — Fluent
- English — Fluent
- Tigrigna — Fluent

WORK EXPERIENCE

Full Stack Developer Sep 2025 – Apr 2026

Vite Technologies PLC

- Developed and maintained full-stack web applications using Vue.js, Express.js, NestJS, and MongoDB.
- Designed and implemented scalable RESTful APIs for frontend applications.
- Built responsive and user-friendly interfaces with a focus on performance and usability.
- Collaborated with developers using Git and GitHub to deliver high-quality software solutions.

Web Developer Intern (Remote) Jul 2025 – Oct 2025

CodeAlpha

- Developed responsive web components and integrated REST APIs.
- Maintained and tested web applications to improve functionality and performance.
- Successfully completed the internship and earned a Web Development Internship Certificate.

Full Stack Developer Intern Jan 2025 – May 2025

Vite Technologies

- Assisted in developing full-stack web applications using modern JavaScript technologies.
- Built frontend and backend features while collaborating with senior developers.
- Participated in testing, debugging, and improving application performance.

PROJECTS

AI-Powered Adaptive Learning System

Tech Stack: Vue.js, NestJS, MongoDB, Gemini API, RAG (Retrieval-Augmented Generation)

- Developed a full-stack AI-powered learning platform that delivers personalized educational support based on the Ethiopian curriculum.
- Integrated the Gemini API with Retrieval-Augmented Generation (RAG) to provide accurate, context-aware responses from curriculum materials.
- Implemented features including document upload, AI-powered question answering, automatic summaries, quiz generation, and student progress tracking.

Home Rental Platform

Tech Stack: Vue.js, NestJS, MongoDB

- Built a full-stack web application that connects landlords and tenants for long-term property rentals.
- Developed features for property listing and management, property search, detailed listings, and rental booking.
- Designed a responsive interface and secure backend to streamline the rental process for both property owners and tenants.

AI Loan Default Prediction for Microfinance Institutions

Tech Stack: Machine Learning, Vue.js, NestJS, MongoDB

- Developed a machine learning-powered web application that predicts the likelihood of loan default based on applicant data.
- Built an intuitive interface that enables loan officers to evaluate risk and make informed lending decisions.
- Improved decision-making efficiency by providing data-driven risk assessments for microfinance institutions.
